Four Lynx helicopters which underwent the Return To Parts (RTP) programme at Middle Wallop were sold and left this AAC air station by road during June 2017. On 8 June 2017 both ZF539 and ZG888 left Middle Wallop, followed by ZG887 and ZG914 on 15 June 2017. Their destinations remain unknown at this point in time.

MAR reports that 657sq Lynx AH9A ZG921 suffered an accident on 29 June 2017. Details are unknown, as well as the extent of the damage.

**Armee de l'Air du Chad (AF)**

On the 1st of July a huge storm struck the capital of Chad, N'Djamena, also the airport was hit and a significant amount of aircraft and helicopters of the air force were damaged or destroyed. Many of the old hangars were damaged and the newer tent-hangars were ripped apart. Looking at the pictures on internet the PC-12 mentioned below seems to be written-off. The Su-25 TT-QAI, Su-25UB TT-QAM, MiG-29 TT-OAP and AS550C2 TT-OAV suffered some damage. At least another five AS550s were damaged or destroyed. Some sources reported no less than eight helicopters were destroyed and five other helicopters were damaged, but this we can't confirm yet. The Presidential Boeing 737, TT-ADB, an An-26, a French C-135FR and two French CN-235 were spared or just slightly damaged.
